COMMUNITY OVERVIEW & HOUSING MARKET SUMMARY

Saginaw Charter Township,
Michigan

2025

I. INTRODUCTION

A. PURPOSE

The East Michigan Council of Governments retained Bowen National Research in September 2024 for the purpose of conducting a Community Overview and Housing Market Summary of Saginaw Charter Township, Michigan. This overview was completed in conjunction with the Housing Needs Assessment for Region G in the state of Michigan.

With changing demographic characteristics and trends expected over the years ahead, it is important for the local government, stakeholders and its citizens to understand the current market conditions and projected changes that are anticipated to occur that will influence future housing needs. Toward that end, this report intends to:

- Provide an overview of present-day Saginaw Charter Township, Michigan.
- Present and evaluate past, current and projected detailed demographic characteristics.
- Present and evaluate employment characteristics and trends, as well as the economic drivers impacting the community.
- Determine current characteristics of major housing components within the market (for-sale/ownership and rental housing alternatives).
- Provide housing gap estimates by tenure (renter and owner) and income segment.

By accomplishing the study's objectives, government officials, area stakeholders, and housing advocates can: (1) better understand the community's evolving housing market, (2) establish housing priorities, (3) modify, expand, or introduce local government housing policies, and (4) enhance and/or expand the community's housing market to meet current and future housing needs.

B. METHODOLOGIES AND DATA SOURCES

The following methods and data sources were used by Bowen National Research:

Study Area Delineation

The primary geographic scope of this study is Saginaw Charter Township, Michigan. A description of the individual study area and corresponding maps are included in Section II.

Demographic Information

Demographic data for population, households, and housing was secured from ESRI, the 2010 and 2020 U.S. Census, the U.S. Department of Commerce, and the American Community Survey. This data has been used in its primary form and by Bowen National Research for secondary calculations. Estimates and projections of key demographic data for 2024 and 2029 were also provided.

Employment Information

Employment information was obtained and evaluated for various geographic areas that were part of this overall study. This information included data related to employment by job sector, total employment, unemployment rates, identification of top employers, and identification of large-scale job expansions or contractions. Most information was obtained through the U.S. Department of Labor, Bureau of Labor Statistics. Bowen National Research also conducted numerous interviews with local stakeholders familiar with the area's employment characteristics and trends.

Housing Supply

This study focuses on rental and for-sale housing components. Rentals include multifamily apartments (generally five+ units per building) and non-conventional rentals (single-family homes, duplexes, mobile homes, etc.). For-sale housing includes individual homes, mobile homes, and projects within subdivisions. It is important to note, depending upon the availability of data and housing product, we present and evaluate housing data as reported by secondary data sources and/or collected by Bowen National Research.

Housing Gap Estimates

Based on the demographic data for both 2024 and 2029 and taking into consideration the housing data from our field survey of area housing alternatives, we are able to project the potential number of new housing units that are needed (housing gap) in the county, then apportioned part of this gap toward the smaller subject market. The following summarizes the metrics used in our demand estimates.

We included renter and owner household growth, the number of units required for a balanced market, the need for replacement of substandard housing, commuter/external market support, severe cost-burdened households, and step-down support as the demand components in our estimates for new rental and for-sale housing units. As part of this analysis, we accounted for vacancies reported among both renter- and owner-occupied housing alternatives, considered applicable units in the development pipeline, and concluded this analysis by providing the number of units that are needed by different income segments, rent levels, and purchase price points.

C. <u>REPORT LIMITATIONS</u>

The intent of this report is to collect and analyze selected data for Saginaw Charter Township, Michigan. Bowen National Research relied on a variety of data sources to generate this report. These data sources are not always verifiable; however, Bowen National Research makes a concerted effort to assure accuracy. While this is not always possible, we believe that our efforts provide an acceptable standard margin of error. Bowen National Research is not responsible for errors or omissions in the data provided by other sources.

We have no present or prospective interest in any of the properties included in this report, and we have no personal interest or bias with respect to the parties involved. Our compensation is not contingent on an action or event resulting from the analyses, opinions, or use of this study. Any reproduction or duplication of this study without the expressed approval of the East Michigan Council of Governments or Bowen National Research is strictly prohibited.

II. COMMUNITY OVERVIEW & HOUSING MARKET SUMMARY

In May 2025, Bowen National Research completed an eight-county Housing Needs Assessment of Region G in the state of Michigan. In conjunction with the regional Housing Needs Assessment, individual housing overviews were also prepared for select communities within the region.

This housing overview includes a summary of demographic, economic and housing metrics specific to Saginaw Charter Township, Michigan. To provide a base of comparison, various metrics of Saginaw Charter Township are compared with Saginaw County and statewide numbers. Hereinafter, and for the purposes of this analysis, Saginaw Charter Township will simply be referred to as *Saginaw Township*.

The analyses on the following pages provide overviews of key demographic and economic data, summaries of the multifamily rental market and for-sale housing supply, and general conclusions on the housing needs of the area. Demographic projections included in this overview assume that no significant government policies, programs or incentives are enacted that would drastically alter residential development or economic activity.

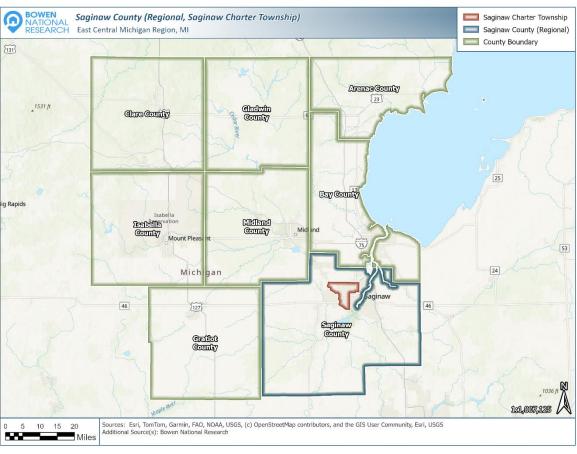

It is important to note that 2010 and 2020 demographic data are based on U.S. Census data (actual count), while 2024 and 2029 data are based on calculated <u>estimates</u> provided by ESRI, a nationally recognized demography firm. Additionally, secondary housing data included within this analysis uses a combination of ESRI estimates and data obtained from the American Community Survey (ACS). As such, differences in totals and shares among various tables within this analysis may exist. Also note that due to the relative size of the population and number of households in the subject community, the margins of error for survey-driven data from sources such as the American Community Survey may be higher compared to larger geographies. Nonetheless, the demographic data provided as part of this analysis is the most accurate available, as provided by the aforementioned reputable sources.

A. INTRODUCTION

Saginaw Township is within Saginaw County, Michigan. Located in the East Central Region of Michigan, Saginaw Township encompasses approximately 25 square miles. The community has an estimated 2024 population of 41,649, representative of approximately 22.2% of the population in Saginaw County. Interstate 675, which runs along the eastern limits of the township, serves as the primary connector for Saginaw Township. State Routes 58 and 84 each serve as commercial arterials for the township.

Maps illustrating Saginaw Township, Michigan and Saginaw County in relation to Region G are included on the following page.

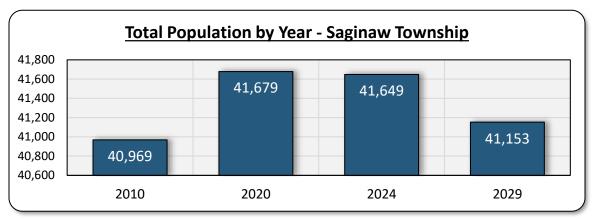

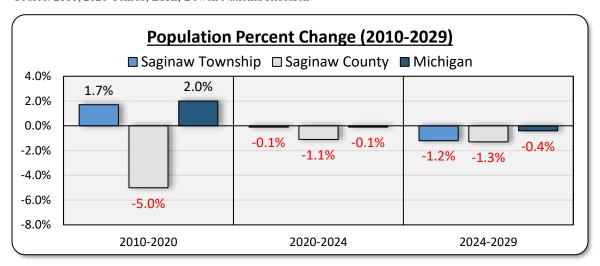

B. DEMOGRAPHICS

This section of the report evaluates key demographic characteristics for Saginaw Township. Demographic comparisons provide insights into the human composition of housing markets. It should be noted that some total numbers and percentages may not match the totals within or between tables/graphs in this section due to rounding.

The following graphs illustrate *total population* by year for Saginaw Township and population *percent* changes for each study area between 2010 and 2029.

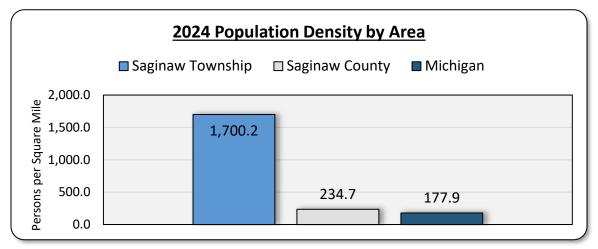

Source: 2010, 2020 Census; ESRI; Bowen National Research

Source: 2010, 2020 Census; ESRI; Bowen National Research

The population in Saginaw Township increased by 710 (1.7%) between 2010 and 2020. This contrasts with the 5.0% decline for the county and is slightly smaller than the 2.0% increase for the state during the time period. Between 2020 and 2024, the population in Saginaw Township decreased by 0.1%, and the population within the township is projected to decline by 1.2% over the next five years. The projected population decline within Saginaw Township is slightly less than that projected for the county (1.3%) but greater than that projected for the state (0.4%) during this time period. Household growth, which is a better reflection of housing needs, is discussed later in this section.

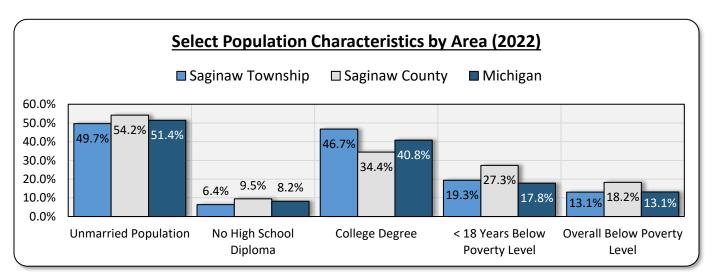

Source: 2010, 2020 Census; ESRI; Bowen National Research

With a population density of 1,700.2 persons per square mile, Saginaw Township is significantly more densely populated than Saginaw County and the state of Michigan.

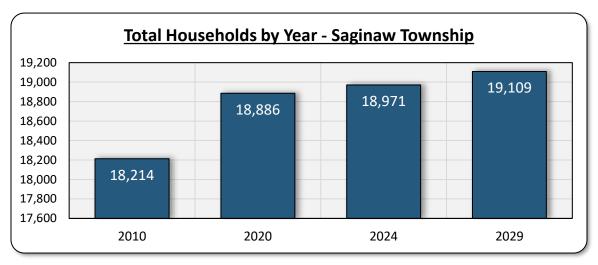

The following graph illustrates *select population characteristics* that typically influence housing affordability for each of the study areas.

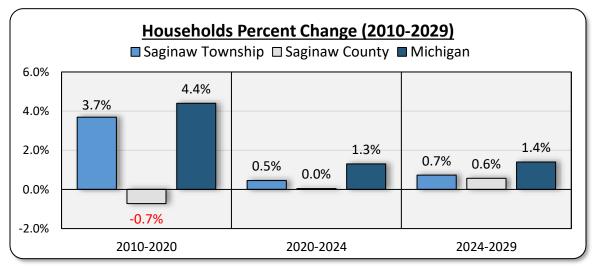

Source: 2018-2022 American Community Survey; ESRI; Bowen National Research

As the data illustrates, Saginaw Township has a lower share of the unmarried population (49.7%), a lower share of the population without a high school diploma (6.4%), and a higher share of individuals with a college degree (46.7%) as compared to the county. The two educational attainment factors likely have a positive influence on household income within the township. Overall, Saginaw Township has lower poverty rates for children less than 18 years of age (19.3%) and the overall population (13.1%) when compared to county, though the childhood poverty rate in the township is higher than the state share (17.8%).

The following graphs illustrate the number of *total households* by year for Saginaw Township and household *percent* changes for each study area between 2010 and 2029.

Source: 2010, 2020 Census; ESRI; Bowen National Research

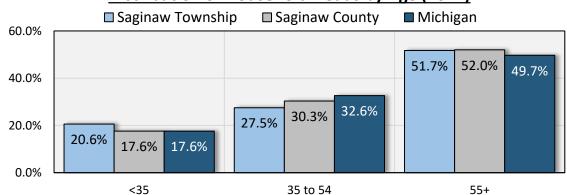

Source: 2010, 2020 Census; ESRI; Bowen National Research

The number of households in Saginaw Township increased by 672 (3.7%) between 2010 and 2020. This contrasts with the 0.7% decrease within the county but represents a smaller percentage increase than the state (4.4%) during this time period. Between 2020 and 2024, the number of households in Saginaw Township increased by 0.5%, with the township's household base projected to increase by 0.7% between 2024 and 2029. This is a slightly larger projected increase compared to the county, but smaller than the 1.4% increase projected for the state over the next five years. While household growth can heavily influence the total housing needs of a market, factors such as households living in substandard or cost-burdened housing, people commuting into the area for work, pent-up demand, and availability of existing housing all affect housing needs. These factors are addressed throughout this overview.

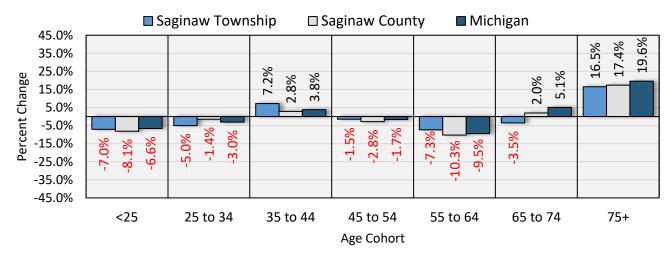

The following table and graphs illustrate *household heads by age* for the subject community, the distribution in 2024, and the projected percent changes between 2024 and 2029 for each of the study areas.

				House	ehold Heads b	y Age		75+ 3,100 (16.4%) 3,307 (17.4%) 3,854			
		<25	25 to 34	35 to 44	45 to 54	55 to 64	65 to 74	75+			
	2020	1,028	2,784	2,478	2,714	3,383	3,399	3,100			
	2020	(5.4%)	(14.7%)	(13.1%)	(14.4%)	(17.9%)	(18.0%)	(16.4%)			
	2024	938	2,975	2,623	2,605	3,082	3,441	3,307			
Saginaw	2024	(4.9%)	(15.7%)	(13.8%)	(13.7%)	(16.2%)	(18.1%)	(17.4%)			
Township	2020	872	2,827	2,812	2,567	2,857	3,320	3,854			
	2029	(4.6%)	(14.8%)	(14.7%)	(13.4%)	(15.0%)	(17.4%)	(20.2%)			
	Change	-66	-148	189	-38	-225	-121	547			
	2024-2029	(-7 .0%)	(-5.0%)	(7.2%)	(-1.5%)	(-7.3%)	(-3.5%)	(16.5%)			

Distribution of Household Heads by Age (2024)

Projected Percent Change in Household Heads by Age (2024-2029)

Source: ESRI; Bowen National Research

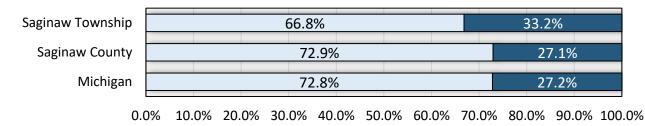

While the largest share (51.7%) of households within Saginaw Township in 2024 are aged 55 years and older, households are more concentrated among those less than 35 years of age (20.6%) when compared to the county and state. While households aged 75 and older are projected to increase by 16.5% within Saginaw Township over the next five years, note that households between the ages of 35 and 44 are projected to increase by 7.2% during this period. These projected changes will likely result in an increase in demand for a variety of family and senior-oriented housing product within the township.

The following table and graph illustrate *households by tenure* (renters and owners) for the subject community in 2024 and compare the shares by tenure for each of the study areas.

	Households by Tenure								
		20	20	2024					
	Household Type	Number	Percent	Number	Percent				
Coginary	Owner-Occupied	12,135	64.3%	12,678	66.8%				
Saginaw Township	Renter-Occupied	6,751	35.7%	6,293	33.2%				
	Total	18,886	100.0%	18,971	100.0%				

Source: 2020 Census; ESRI; Bowen National Research

Households by Tenure (2024)

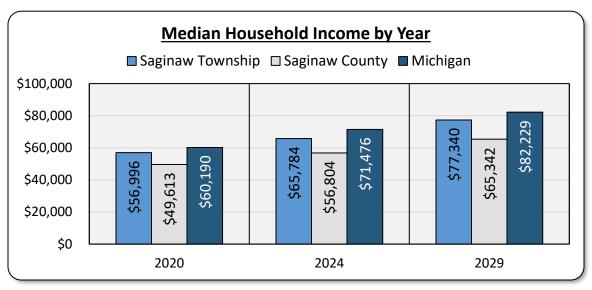

□ Owner-Occupied

Source: 2020 Census; ESRI; Bowen National Research

In 2024, the distribution of households by tenure in Saginaw Township (66.8% owners and 33.2% renters) is more heavily weighted toward renter households as compared to the county and state. While changes in the number of households by tenure over time will influence housing needs, it is important to understand that housing demand is influenced by a variety of factors, which may include existing pent-up demand, substandard housing, housing cost burden, commuting, and/or other factors.

■ Renter-Occupied

The following compares the *median household income* for each of the study areas from 2020 to 2029.

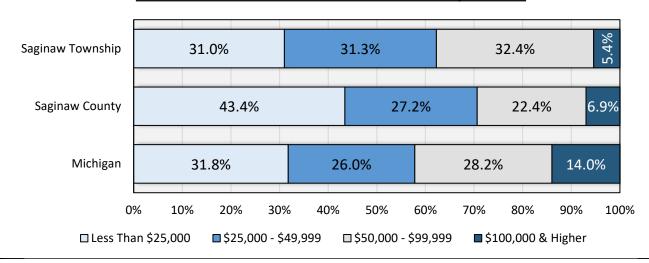

Source: 2020 Census; ESRI; Bowen National Research

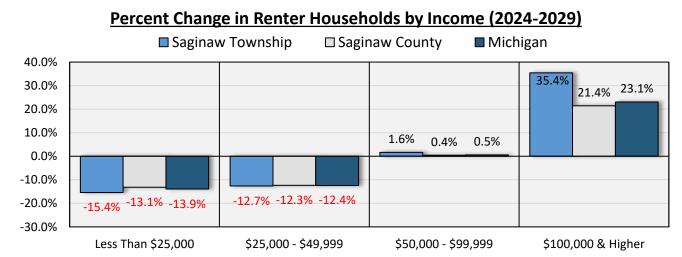

As the preceding illustrates, the 2024 median household income in Saginaw Township (\$65,784) is 15.8% higher than the county median household income and 8.0% lower than the statewide median household income. Over the next five years, it is projected that the median household income in Saginaw Township will increase to \$77,340, representing an increase of 17.6%. The projected median household income in Saginaw Township will remain above that of the county but below the statewide median income over the next five years.

The following table and graphs illustrate *renter households by income* for the subject community and compare the distribution and the projected *percent* changes in renter households by income between 2024 and 2029 for each of the study areas.

				Re	enter Househ	olds by Incor	ne

2024 Distribution of Renter Households by Income

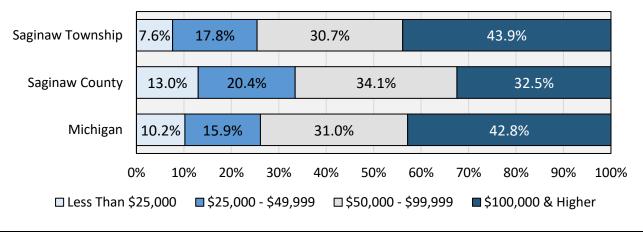

Source: 2020 Census; ESRI; Bowen National Research

In 2024, Saginaw Township has notably higher shares of renter households with incomes between \$25,000 and \$49,999 (31.3%) and between \$50,000 and \$99,999 (32.4%) when compared to the state. Note that only 5.4% of renter households in the township earn \$100,000 or more. Between 2024 and 2029, renter household growth in all three geographies is projected to be among households earning \$50,000 or higher. Within Saginaw Township, renter households earning between \$50,000 and \$99,999 are projected to increase by 1.6%, while renter households earning \$100,000 or higher are projected to increase by 35.4%. Despite these changes, the majority (57.1%) of renter households in Saginaw Township will continue to earn less than \$50,000 through 2029, and 27.9% will continue to earn less than \$25,000 annually.

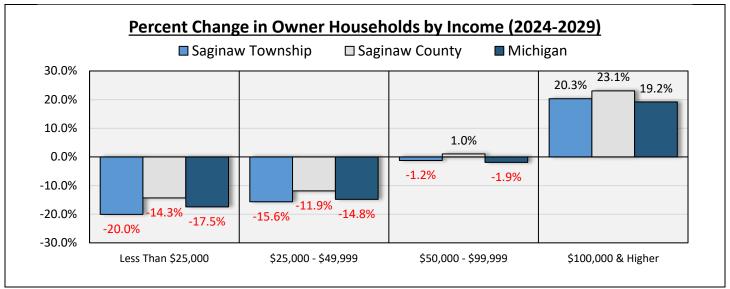

The following table and graphs illustrate *owner households by income* for the subject community in 2024 and compare the distribution and the projected *percent* changes in owner households by income between 2024 and 2029 for each of the study areas.

			Owner Households by Income								
		Less Than \$15,000	\$15,000 - \$24,999	\$25,000 - \$34,999	\$35,000 - \$49,999	\$50,000 - \$74,999	\$75,000 - \$99,999	\$100,000 - \$149,999	\$150,000 & Higher

	2024-2029	(-17.2%)	(-22.1%)	(-16.7%)	(-15.0%)	(-4.8%)	(2.9%)	(16.1%)	(24.3%)		

2024 Distribution of Owner Households by Income

Source: 2020 Census; ESRI; Bowen National Research

Source: 2020 Census; ESRI; Bowen National Research

In 2024, 43.9% of Saginaw Township owner households earn \$100,000 or more, which is a larger share compared to the county (32.5%) and state (42.8%). Between 2024 and 2029, the most significant growth (20.3%) in owner households is projected to be among households earning \$100,000 or more, while owner households earning less than \$100,000 are projected to decrease during this period. By 2029, it is projected that over one-half (50.7%) of owner households in Saginaw Township will earn \$100,000 or more per year.

The following table illustrates the *components of population change* for <u>Saginaw County</u> and the state of Michigan between April 2020 and July 2024. Note that components of change data is only available at the county level or higher. The estimate for each geography includes a *residual* value, which is the change that cannot be attributed to any specific component. The residual value adjusts the total population change for the given geography so that the sum of each county equals the state, and each state equals the total national population change.

Estimated Components of Population Change by Area April 1, 2020 to July 1, 2024										
Change Components of Change										
			Natural	Domestic	International	Net				
Area	Number	Percent	Change	Migration	Migration	Migration	Residual*			
Saginaw County	-2,408	-1.3%	-2,599	-597	742	145	46			
Michigan	61,121	0.6%	-38,340	-67,785	164,465	96,680	2,781			

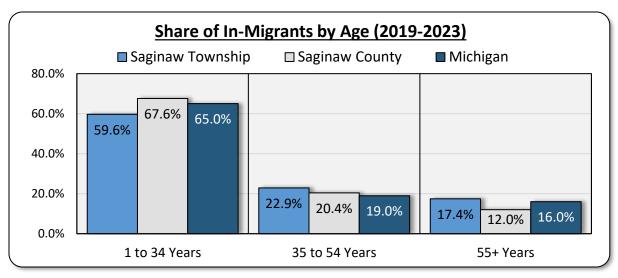

*Each geography includes residual representing the change that cannot be attributed to any specific demographic component

Saginaw County experienced natural decrease (more deaths than births) and negative domestic migration between 2020 and 2024. Conversely, international migration was a positive component of population change in Saginaw County. In order to improve upon natural change, it is critical for a geography to retain and attract young households. While other factors such as employment can determine where a household ultimately chooses to reside, one of the key components to this decision is housing

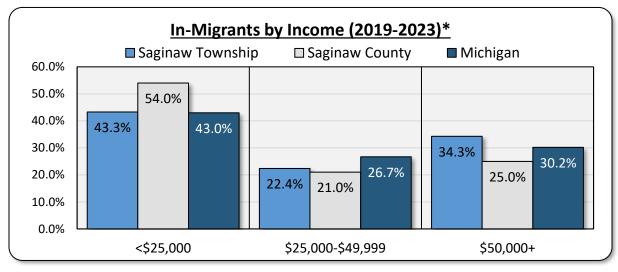

Source: U.S. Census Bureau, Population Division, March 2025

availability and affordability. While this data is not specific to Saginaw Township, it is reasonable to conclude that the components of population change for Saginaw County likely have a significant influence on each of the geographies located within the county.

The following graphs illustrate the distribution of *in-migrants by age* and *by income* for each study area from 2019 to 2023. Note that the data illustrated in both graphs is based on *population*, not households.

Source: U.S. Census Bureau, 2023 5-Year American Community Survey (S0701); Bowen National Research

Source: U.S. Census Bureau, 2023 5-Year American Community Survey (B07010); Bowen National Research *Excludes population with no income

While the largest share (59.6%) of in-migrants to Saginaw Township are less than 35 years old, the distribution of in-migrants by age is more weighted toward middle-aged persons (35 to 54 years) and older persons (aged 55 and older) as compared to the distribution within the county and state. The distribution of in-migrants by income within Saginaw Township is concentrated among the lowest income cohort (less than \$25,000), while those that earn \$50,000 or more represent over one-third (34.3%) of in-migrants to the township.

C. ECONOMY AND WORKFORCE ANALYSIS

Note that some economic data specific to Saginaw Township is not available within this section. In these instances, data for Saginaw County has been provided as economic trends within the county likely influence economic conditions within Saginaw Township.

Labor Force

The following table illustrates *the employment base by industry* for Saginaw Township, Saginaw County, and the state of Michigan. The top five industries by share of employment for each area are highlighted in **red** text.

			Employment	by Industry		
	Saginaw '	Fownship	Saginaw	County	Mich	igan

Source: 2020 Census; ESRI; Bowen National Research

Note: Since this survey is conducted of establishments and not of residents, some employees may not live within each market. These employees, however, are included in our labor force calculations because their places of employment are located within each market.

Saginaw Township has an employment base of over 24,000 individuals within a broad range of employment sectors. The labor force within the area comprises approximately 23.9% of the total Saginaw County employment base and is based primarily in five sectors: Health Care & Social Assistance (24.6%), Retail Trade (15.0%), Administrative, Support, Waste Management & Remediation Services (11.4%), Accommodation & Food Services (11.2%), and Educational Services (7.5%). Combined, the top five job sectors represent 69.7% of the township's employment base.

Total employment reflects the number of employed persons who live within an area regardless of where they work. The following illustrates the *total employment* base for <u>Saginaw County</u> between 2015 and February 2025.

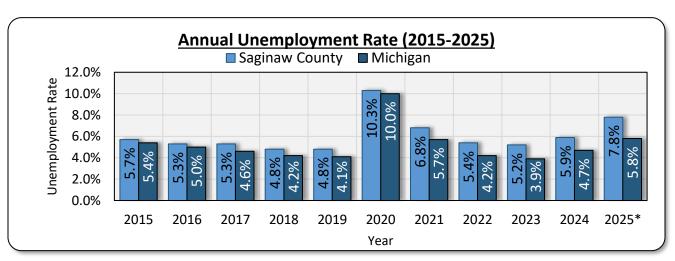

Source: Department of Labor; Bureau of Labor Statistics; Bowen National Research

*Through February

As the preceding illustrates, total employment within Saginaw County fluctuated between 2015 and 2019, but decreased 1.1% overall during this period. In 2020, total employment decreased by 6,430 jobs (7.8%) within the county, which can be largely attributed to the economic impact of the COVID-19 pandemic. Following a slight decrease in 2021, total employment in the county increased for three consecutive years. As of year-end 2024, total employment was at 96.9% of the 2019 level. While the increasing employment base is a positive economic indicator for the county economy, it has yet to recover all of the jobs lost during 2020.

The following illustrates the *annual unemployment rate* for <u>Saginaw County</u> and the state of Michigan from 2015 to February 2025.

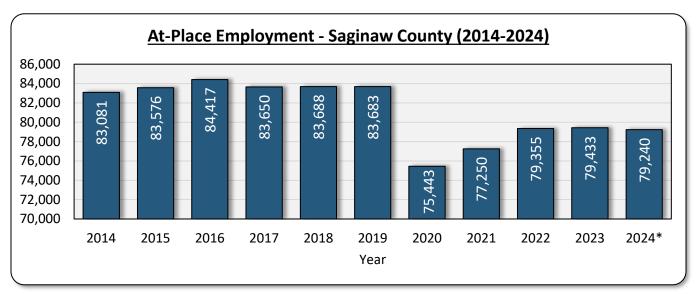

Source: Department of Labor, Bureau of Labor Statistics; Bowen National Research

*Through February

As the preceding data shows, the unemployment rate in Saginaw County declined from 5.7% in 2015 to 4.8% in 2019. After the sharp increase in 2020 (to 10.3%), the unemployment rate in the county dropped to 5.2% in 2023. However, the unemployment rate increased to 5.9% in 2024. While the unemployment rate in the state also increased in 2024, the county unemployment rate is higher than the state and has been above the statewide rate each year since 2015. This indicates that unemployment has been a challenge within the county in recent years.

At-place employment reflects the total number of jobs within the county regardless of the employee's county of residence. The following illustrates the total *at-place employment* base for Saginaw County from 2014 to September 2024.

Source: Department of Labor; Bureau of Labor Statistics; Bowen National Research *Through September

As the preceding illustrates, at-place employment within Saginaw County remained stable between 2014 and 2019, representing a 0.7% increase during this period. The largest decrease (9.8%) in at-place employment occurred in 2020, which can be largely attributed to the economic effects related to the COVID-19 pandemic. Through September 2024, at-place employment within the county was at 94.7% of the 2019 level. Although this indicates some softness in the labor market likely exists in Saginaw County, at-place employment has increased three consecutive years, starting in 2021.

Economic Outlook

The Worker Adjustment and Retraining Notification (WARN) Act requires advance notice of qualified plant closings and mass layoffs. WARN notices were reviewed on March 18, 2025. According to the Michigan Department of Labor and Economic Opportunity and Michigan Department of Technology, Management & Budget, there have been three WARN notices reported for Saginaw County over the past 12 months. The following table summarizes the details of the WARN notices for Saginaw County.

WARN Notices – Saginaw County									
Company	Notice Date	Effective Date							
Tervis Tumbler Company	Frankenmuth	3	N/A	November 11, 2024					
Charter Communications									
Regional Support Center	Saginaw	78	N/A	February 6, 2025					
Lippert Components, Inc.	Chesaning	159	N/A	April 4, 2025					

Sources: Michigan Department of Labor and Economic Opportunity; Michigan Department of Technology, Management, and Budget N/A – Not Available

The preceding table shows a total of 240 jobs were lost countywide among the three companies that filed recent WARN notices. Note that the WARN notice filed for the Tervis Tumbler Company actually reflects a total of 60 jobs nationally, of which only three are located within Saginaw County. The WARN notice filed by Lippert Components reflects the planned closure of two facilities in Chesaning, which would eliminate a total of 159 jobs. The only WARN notice that directly impacts Saginaw Township is the Charter Communications notice, which impacts a total of 78 jobs. While any reduction in jobs is unfortunate, it is important to understand that this is a marginal share (0.3%) of the overall at-place employment within the county.

The following illustrates the largest employers within Saginaw County:

Largest Employers – Saginaw County									
Employer Name	Business Type	Total Employed							
Covenant HealthCare	Healthcare	4,800							
Nexteer Automotive	Manufacturing	3,800							
Morley Companies	Hospitality	2,148							
Meijer	Retail	1,425							
Hemlock Semiconductor	Manufacturing	1,400							
Ascension St. Mary's of Michigan/									
MyMichigan Medical Center Saginaw	Healthcare	1,325							
Saginaw Valley State University	Education	1,001							
Frankenmuth Bavarian Inn	Hospitality	1,000							
Aleda E. Lutz Veteran Affairs Medical Center	Healthcare	982							
Means Industries	Manufacturing	832							

Sources: Saginaw Future

Major employers within Saginaw County are primarily involved in healthcare, manufacturing, retail, hospitality, and education. While a number of the largest employers in the county are engaged in industries that are generally considered stable industries (healthcare, education, etc.) and are typically less susceptible to economic downturns, certain types of manufacturing, retail, and hospitality businesses can be affected by economic conditions.

The following tables summarize recent and ongoing economic development projects and infrastructure projects identified within Saginaw County:

	Econom	ic Development	Activity – Saginaw County
Project Name / Location	Investment	Job Creation	Scope of Work/Details
Amigo Mobility International			Medical supply store underwent an expansion in 2024. Additional
Saginaw	\$31,820	36	information unknown.
Corning Inc./Solar Technology			Construction started on a solar component factory with one million
Richland Township	\$1.5 billion	1,500	square feet in 2024. ECD end of 2025.
			Plans announced spring 2024. The new 2,560-square-foot facility
			will be used for bagging, palletizing, storage, and loading edible
Freeland Bean & Grain			beans for export. Combining operations into one location to improve
Freeland	\$855,401	14	efficiency. Additional information unknown.
Fullerton Tool Company			Manufacturer of drills, carbide end mills, and cutting tools expanded
Saginaw	\$3.7 million	13	in 2024. Additional information unknown.
Spence Brothers			General contractor's expansion underway in 2024. Additional
Saginaw	\$51,000	100	information unknown.
Spicer Group			Land surveyor company's expansion underway in 2024. Additional
Saginaw	\$66,451	20	information unknown.
			Manufacturer of e-motion technologies and ball screws for multiple
Umbra Group			sectors (industrial, energy, and aerospace) expanded in 2024.
Saginaw	\$1.1 million	13	Additional information unknown.
WTA Architects			Architecture firm expanded in 2024. Additional information
Saginaw	\$49,160	26	unknown.

ECD – Estimated Completion Date

Saginaw	work along with water systems updates.	2025. ECD October 2025.	million								

ECD – Estimated Completion Date

Saginaw County is expected to add over 1,700 new jobs during the next few years. Most of this job creation and investment will take place at an advanced manufacturing facility that is currently being built by Corning. This facility will produce solar components and is expected to offer wages that are above the median wage for the region. Corning originally announced this facility would employ approximately 1,100 people and have a direct investment of \$900 million. In April 2025, Corning announced that an *additional* 400 jobs would be created at this facility, reflecting an additional \$600 million investment. A total of six economic investment projects are within Saginaw Township. It is estimated that these projects will create over 200 new jobs in Saginaw Township. In addition to the planned job creation in the county and Saginaw Township, several reconstruction and resurfacing projects involving roads, bridges, and drainage systems are taking place in the city of Saginaw.

Commuting Data

The ability of a person or household to travel easily, quickly, safely, and affordably throughout a market influences the desirability of a housing market. In addition, the individuals commuting into a market from neighboring markets represent a potential base of support for future residential development.

The following tables summarize two *commuting pattern attributes* (mode and time) for each of the study areas.

				Co	mmuting Mo	ode		
		Drove		Public		Other	Worked	
		Alone	Carpooled	Transit	Walked	Means	at Home	Total

Source: ESRI; Bowen National Research

As the preceding illustrates, 91.2% of individuals in Saginaw Township utilize their own vehicles or carpool to work, 1.3% utilize public transit or walk to work, and 7.1% work from home. This indicates that the vast majority of workers in the township rely on private transportation to commute to work. Overall, 75.6% of commuters have commutes less than 30 minutes to their place of employment. As such, nearly 83% of individuals in the area have relatively short commute times or work from home, while only 5.2% have commute times of 60 minutes or more.

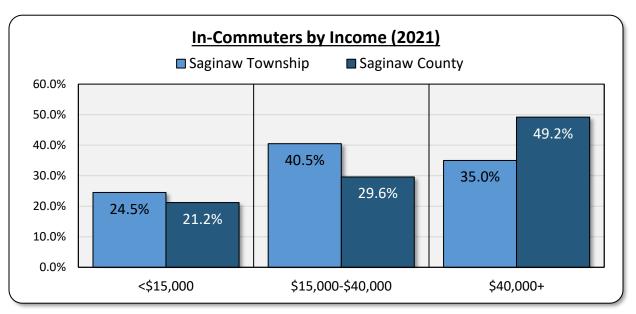

The following illustrates the overall *commuter flow* for Saginaw Township based on 2021 U.S. Census Longitudinal Origin-Destination Employment Statistics (LODES) data.

Source: U.S. Census, Longitudinal Origin-Destination Employment Statistics (LODES); Bowen National Research

Of the approximately 19,995 persons *employed* in Saginaw Township in 2021, 84.2% (16,832) originate from outside the township, while 15.8% (3,163) live within the township. Over 13,800 residents of Saginaw Township commute to surrounding areas daily for employment. Regardless, the 16,832 non-residents who work in the area represent a substantial base of potential support for future residential development within Saginaw Township.

The following compares the distribution of *in-commuters by annual income* for Saginaw Township and Saginaw County.

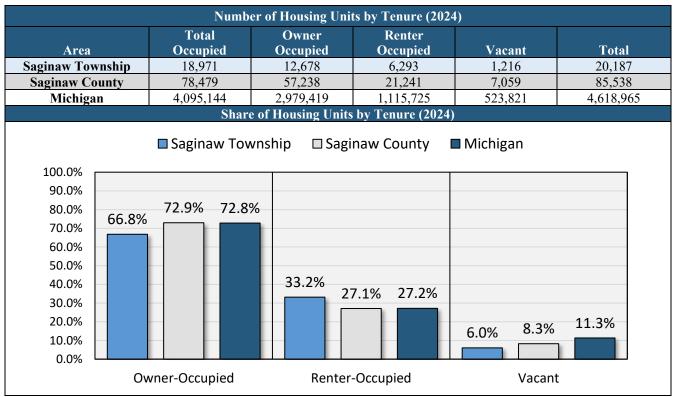

Source: U.S. Census, Longitudinal Origin-Destination Employment Statistics (LODES); Bowen National Research

The preceding shows that the largest share (40.5%) of in-commuters to Saginaw Township earn between \$15,000 and \$40,000 annually, while 35.0% earn \$40,000 or more, and 24.5% earn less than \$15,000 annually. As such, the distribution of incommuter income within Saginaw Township is more heavily weighted toward those earning less than \$40,000 as compared to the county. Regardless, a variety of housing types could be developed to potentially attract some of the 16,832 in-commuters to live within Saginaw Township. We accounted for a portion of the in-commuters as additional household growth in the housing gaps shown later in this overview.

D. HOUSING METRICS

The estimated distribution of the area *housing stock by occupancy/tenure status* for each study area for 2024 is illustrated in the following table and graph:

Source: 2020 Census; ESRI; Bowen National Research

Of the 18,971 total *occupied* housing units in Saginaw Township, 66.8% are owner occupied and 33.2% are renter occupied. This is more heavily weighted toward renter-occupied housing when compared to the county and state. Among the 20,187 total housing units in Saginaw Township, 6.0% (1,216 units) are classified as vacant. This is a lower share of vacant units as compared to both the county (8.3%) and the state (11.3%). Vacant units are comprised of a variety of units including abandoned properties, unoccupied rentals, for-sale homes, and seasonal housing units. According to 2019-2023 American Community Survey estimates (Table ID B25004), 8.1% of vacant housing units in Saginaw Township are classified as seasonal/recreational units. This is a much smaller share of such units compared to the Region G share of 56.4%. While a portion of the vacant units in Saginaw Township are seasonal/recreational units, the influence of these units is significantly less than the influence in the overall region.

The following table compares key *housing age and conditions* based on American Community Survey and ESRI data. Housing units built over 50 years ago (pre-1970), overcrowded housing (1.01+ persons per room), or housing that lacks complete indoor kitchens or bathroom plumbing are illustrated by tenure. It is important to note that some occupied housing units may have more than one housing issue.

					Housing	Age and (Condition	s (2024)				
		Pre-1970	0 Product		Overcrowded				Incomplete Plumbing or Kitchen			
	Rer	nter	Owi	ner	Ren	iter	Ow	ner	Ren	iter	Ow	ner
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Saginaw Township	1,399	22.0%	5,614	44.9%	85	1.3%	16	0.1%	204	3.2%	12	0.1%
Saginaw County	10,235	48.2%	31,093	54.6%	314	1.5%	546	1.0%	454	2.1%	159	0.3%
Michigan	496,850	44.8%	1,392,778	47.3%	31,042	2.8%	33,798	1.1%	21,323	1.9%	19,540	0.7%

Source: American Community Survey; ESRI; Bowen National Research

In Saginaw Township, 22.0% of the renter-occupied housing units and 44.9% of the owner-occupied housing units were built prior to 1970. The shares of pre-1970 renter-and owner-occupied units in the township are less than the county and statewide shares. The most prevalent housing condition issue in Saginaw Township is the 3.2% share of renter-occupied housing units with incomplete plumbing or kitchen facilities, which is a larger share of such units compared to both the county and state. Other than the relatively high share of renter-occupied units with incomplete plumbing or kitchens, the housing inventory within Saginaw Township does not exhibit extensive condition issues when compared to the county and state.

The following table compares key household income, housing cost, and housing affordability metrics. It should be noted that cost burdened households pay over 30% of income toward housing costs, while severe cost burdened households pay over 50% of income toward housing.

	Household Income, Housing Costs and Affordability							
	Total Households	Median Household Income	Estimated Median Home Value	Median Gross Rent	Share of Cost Burdened Households* (2023)		Share of S Burdened H (20	ouseholds**
	(2024)	(2024)	(2024)	(2022)	Renter	Owner	Renter	Owner
Saginaw Township	18,971	\$65,784	\$179,548	\$943	43.2%	15.8%	20.0%	4.9%
Saginaw County	78,479	\$56,804	\$166,874	\$876	50.4%	16.6%	26.1%	6.5%
Michigan	4,095,144	\$71,476	\$249,290	\$1,037	45.8%	19.1%	23.7%	7.9%

Source: American Community Survey; ESRI; Bowen National Research

The estimated median home value in Saginaw Township of \$179,548 is 7.6% higher than the median home value for the county and 28.0% lower than the state. Similarly, the median gross rent of \$943 is 7.6% higher than that for the county and 9.1% lower than that for the state. With a median household income of \$65,784 in Saginaw Township, approximately 43.2% of renter households and 15.8% of owner households are housing cost burdened. As a result, there are roughly 2,719 renter households and 2,003 owner households in Saginaw Township that are housing cost burdened, of which

^{*}Paying more than 30% of income toward housing costs; **Paying more than 50% of income toward housing costs

approximately 1,259 renter households and 621 owner households are severe cost burdened (paying more than 50% of income toward housing costs). As such, affordable housing alternatives should be an integral part of future housing solutions.

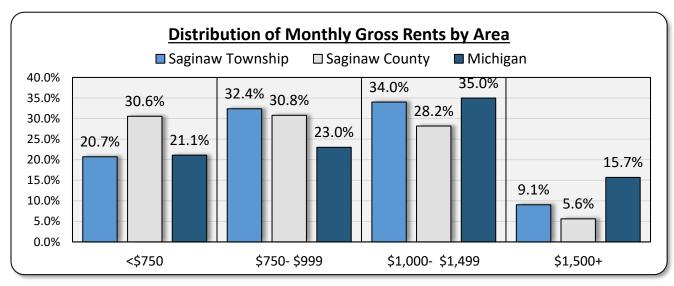

Based on the American Community Survey data, the following is a distribution of all occupied housing by *units in structure by tenure* (renter or owner) for each of the study areas.

		Renter-Occ	Renter-Occupied Housing by Units in Structure				Owner-Occupied Housing by Units in Structure			
		4 Units	5 Units	Mobile Home/		4 Units	5 Units	Mobile Home/		
		or Less	or More	Other	Total	or Less	or More	Other	Total	
Saginaw	Number	2,488	3,717	166	6,371	11,858	187	448	12,493	
Township	Percent	39.1%	58.3%	2.6%	100.0%	94.9%	1.5%	3.6%	100.0%	
Saginaw	Number	12,668	8,048	534	21,251	54,421	437	2,131	56,989	
County	Percent	59.6%	37.9%	2.5%	100.0%	95.5%	0.8%	3.7%	100.0%	
Michigan	Number	558,443	504,600	46,212	1,109,254	2,762,130	36,728	144,116	2,942,974	
Michigan	Percent	50.3%	45.5%	4.2%	100.0%	93.9%	1.2%	4.9%	100.0%	

Source: American Community Survey (2019-2023); ESRI; Bowen National Research

Approximately 41.7% of the *rental* units in Saginaw Township are within structures of four units or less or mobile homes. Overall, Saginaw Township has a notably larger share (58.3%) of multifamily rental housing (five or more units within a structure) when compared to the state (45.5%). Among *owner*-occupied units in Saginaw Township, nearly all are within structures of four units or less (94.9%) and mobile homes (3.6%), though there is a small share (1.5%) within multifamily structures (condominiums/townhomes).

The following graph illustrates the *distribution of monthly gross rents* (per unit) for rental alternatives within each of the study areas. Note that this data includes both multifamily rentals and non-conventional rentals, and gross rents include tenant-paid rents and tenant-paid utilities.

Source: American Community Survey (2019-2023); ESRI; Bowen National Research

^{*}Excludes rentals classified as "No Cash Rent"

As the preceding illustrates, the largest share (34.0%) of Saginaw Township rental units have rents between \$1,000 and \$1,499, followed by units with rents between \$750 and \$999 (32.4%), and those with rents less than \$750 (20.7%). Although considerably less in share, 9.1% of rentals in the area have rents of \$1,500 or more. Compared to the county and state, the distribution of gross rental rates in Saginaw Township is more heavily weighted toward product with rents between \$750 and \$999, though rents within the area are generally well-distributed among all price points.

Bowen National Research's Survey of Housing Supply

Renter-occupied housing in a market is generally classified in one of two categories: *multifamily apartments* or *non-conventional rentals*. Multifamily apartments are typically properties consisting of five or more rental units within a structure, while non-conventional rentals are usually defined as rental properties with four or less units within a structure. The following pages provide an analysis of the rental market within Saginaw Township and Saginaw County based on secondary data from sources such as the American Community Survey and U.S. Census Bureau, and when applicable, includes primary data collected directly by Bowen National Research.

Multifamily Apartments

A survey of multifamily apartment properties was conducted as part of this Housing Market Summary. Multifamily apartments can operate under a number of program types. These can include market-rate rentals and affordable housing programs such as the Low-Income Housing Tax Credit (LIHTC) and various government-subsidized programs. Properties that operate under a LIHTC program, hereinafter referred to as "Tax Credit," are generally restricted to households earning up to 80% of Area Median Housing Income (AMHI), while government-subsidized rental housing typically serves households earning no more than 50% of AMHI and requires tenants to pay only 30% of their income toward housing costs.

The following table summarizes the surveyed multifamily rental supply within Saginaw Township.

Multifamily Supply by Product Type – Saginaw Township							
Project Type	Projects Surveyed	Total Units	Vacant Units	Occupancy Rate			
Market-Rate	16	3,323	101	97.0%			
Tax Credit	1	80	0	100.0%			
Tax Credit/Government-Subsidized	1	100	0	100.0%			
Government-Subsidized	4	316	0	100.0%			
Total	22	3,819	101	97.4%			

Source: Bowen National Research

In Saginaw Township, a total of 22 apartment properties were surveyed, comprising a total of 3,819 units. The overall occupancy rate for the multifamily units in the township is 97.4%, which reflects a total of 101 vacant units. Note that all vacant units are at market-rate properties. Among the Tax Credit and government-subsidized supply there are no vacancies. The exceptionally high occupancy rates for both Tax Credit and government-subsidized units are indicative of a strong market for affordable apartments. Typically, healthy, well-balanced markets have rental housing vacancy rates generally between 4% and 6%. As such, it appears the Saginaw Township market has a notable shortage of multifamily apartments, which may represent a potential future development opportunity in the area.

The following tables illustrate the *median rent by bedroom/bathroom type* for the surveyed *market-rate* and *Tax Credit* units in Saginaw Township and Saginaw County. Note that the tables only include the most common bedroom/bathroom configurations.

Market-Rate Median Rents by Bedroom/Bathroom Type							
	One-Br/ Two-Br/ Two-Br/ Three-Br/						
Area	1.0-Ba	1.0-Ba	2.0-Ba	1.5-Ba			
Saginaw Township	\$855	\$908	\$1,050	\$1,225			
Saginaw County	\$880	\$910	\$1,050	\$1,095			

Source: Bowen National Research

Tax Credit Median Rents by Bedroom/Bathroom Type							
Area	One-Br/ Two-Br/ Two-Br/ Three-Br/ Area 1.0-Ba 1.0-Ba 2.0-Ba 2.0-Ba						
Saginaw Township	\$575	-	-	-			
Saginaw County	\$740	\$895	\$973	\$903			

Source: Bowen National Research

As the preceding illustrates, the median rents for the most common unit configurations in Saginaw Township range from \$855 (one-bedroom/1.0-bathroom) to \$1,225 (three-bedroom/1.5-bathroom) for market-rate units, while the only Tax Credit configuration surveyed within Saginaw Township was a one-bedroom/1.0-bathoom unit, which has a median rent of \$575. The median rents for the market-rate units in the township are lower for smaller unit configurations but higher for the three-bedroom unit configuration compared to Saginaw County. The one-bedroom Tax Credit unit configuration in the township is notably lower than the one-bedroom Tax Credit median rent for the county. With no availability among Tax Credit or government-subsidized multifamily rentals in Saginaw Township, residents are likely to seek rental alternatives among the remaining market-rate multifamily units or non-conventional supply, which also has limited availability. This can result in households seeking housing options outside the area to find more readily available and/or affordable housing choices.

Housing Choice Vouchers, which are administered by local housing authorities, can be utilized to increase rental housing options for lower-income households. The following table summarizes the number of Housing Choice Vouchers (HCVs) issued, the estimated number of unused vouchers, and the number of households on the housing authority's wait list for the next available vouchers in Saginaw County, which includes Saginaw Township.

Ho	Housing Choice Voucher Use – Saginaw County						
Estimated Unused Annual							
Total Vouchers	Unused	Voucher	Program				
Issued	Vouchers Share Turnover Wait List						
663	27	4.1%	48	1,165			

Source: Michigan State Housing Development Authority (MSHDA)

There are currently 663 HCVs issued in Saginaw County, of which 95.9% are currently being utilized. In addition, there are 1,165 households currently on the wait list for additional vouchers within the county, and the annual program turnover is estimated to be 48 vouchers. As such, it appears there is extremely high demand for affordable housing in Saginaw County and this segment of the market is likely severely underserved.

Non-Conventional Rental Housing

Non-conventional rentals are considered rental units typically consisting of single-family homes, duplexes, units over store fronts, and mobile homes. For the purposes of this particular inventory and analysis, we have assumed that rental properties consisting of four or less units within a structure and mobile homes are non-conventional rentals. Overall, 41.7% of the rental units in Saginaw Township are classified as non-conventional rentals.

During May 2025, Bowen National Research conducted an online survey and identified 64 non-conventional rentals that were listed as *available* for rent in Saginaw County. Due to the limited sample size, all available non-conventional rentals within Saginaw County have been evaluated as part of this analysis, regardless of their inclusion within Saginaw Township.

The following table illustrates the vacancy rate, which compares the number of identified *vacant* non-conventional rentals to the *total number* of non-conventional rentals based on the American Community Survey, for Saginaw County.

Non-Conventional Rentals Overview						
Non-Conventional Identified Vacancy						
Area	Rentals*	Vacant Units	Rate			
Saginaw County	13,202	64	0.5%			

Source: American Community Survey (2019-2023); ESRI; Bowen National Research

^{*}ACS reported number of rental units within structures of four units or less and mobile homes

With only 64 available units identified, Saginaw County has an overall vacancy rate of 0.5% for non-conventional rentals, which is well below the optimal range of 4% to 6% for non-conventional rentals and indicates a significant lack of available non-conventional supply in the area.

A summary of the available *non-conventional rental* units in Saginaw County, which includes bedroom type, rent range, and median rent, follows:

Available Non-Conventional Rental Supply – Saginaw County							
Bedroom	Vacant Units	Rent Range	Median Rent				
One-Bedroom	5	\$650 - \$1,400	\$650				
Two-Bedroom	21	\$650 - \$1,400	\$900				
Three-Bedroom	27	\$693 - \$2,500	\$1,050				
Four-Bedroom+	11	\$975 - \$3,300	\$1,295				
Total	64						

Source: Zillow; Apt.com; Trulia; Realtor.com; Facebook

Among the 64 available non-conventional rentals in Saginaw County, median rents by bedroom type range between \$650 (one-bedroom) and \$1,295 (four-bedroom and larger). The three-bedroom units are the most common bedroom type and have a median rent of \$1,050. When utility costs, which are typically \$200 or more, are considered, the median gross rent for the available non-conventional rents is higher than the corresponding median rents for the market-rate and Tax Credit multifamily rentals in the county. While some lower-income households may be able to afford certain non-conventional rentals, there is a notable lack of availability within Saginaw County.

For-Sale Housing

The following table summarizes the *recently sold* (between January 1, 2022 and March 19, 2025) and *available* (as of March 19, 2025) for-sale housing stock for Saginaw Township and Saginaw County.

Sold/Currently Available For-Sale Housing Supply*						
Status	Number of Homes	Median Price				
	Saginaw Township					
Sold	1,427	\$201,000				
Available	64	\$312,400				
	Saginaw County					
Sold	5,837	\$159,900				
Available	280	\$187,450				

Source: Redfin.com & Bowen National Research

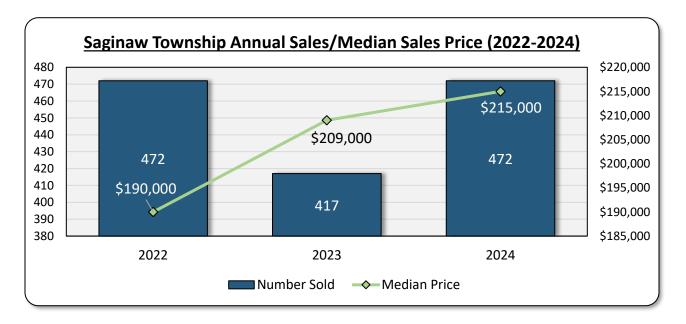

^{*}Historical sales (sold) from January 1, 2022 to March 19, 2025; Available supply as of March 19, 2025

Historical sales from January 2022 to March 2025 in Saginaw Township consisted of 1,427 homes (24.4% of all homes sold within the county during this time period) with a median sales price of \$201,000, which is 25.7% higher than that reported for the county (\$159,900) during this time period. The available for-sale housing stock in Saginaw Township as of March 19, 2025 consists of 64 total units with a median list price of \$312,400. The 64 units available within the township comprise 22.9% of the 280 total units available for purchase within the county. The median list price of \$312,400 within the township is 66.7% higher than the median list price for the county (\$187,450).

The following table and graph summarize <u>historical</u> sales volume and median sales price by year from January 2022 through December 2024.

Sales H	Sales History/Median Sales Price by Year – Saginaw Township (January 1, 2022 to December 31, 2024)							
Voor	Number Percent Median Percent							
Year 2022	Sold 472	Change -	Sales Price \$190,000	Change -				
2023	417	-11.7%	\$209,000	10.0%				
2024	472	13.2%	\$215,000	2.9%				

Source: Redfin.com & Bowen National Research

As the preceding illustrates, the volume of home sales in Saginaw Township decreased by 11.7% between 2022 and 2023, followed by a 13.2% increase in 2024. Despite the fluctuation in sales volume during this period, the median sales price of homes sold in Saginaw Township increased each year. Collectively, the median sales price of homes sold in Saginaw Township increased by 13.2% between January 2022 and December 2024.

The following table provides various housing market metrics for the <u>available</u> for-sale homes in Saginaw Township and Saginaw County as of March 19, 2025. Note that availability rates and Months Supply of Inventory (MSI) numbers that are indicative of limited availability are highlighted in **red** text.

	Available For-Sale Housing (As of March 19, 2025)						
Total Available % Share Availability Median Average Average Days Area Units of County Rate / MSI List Price Square Feet Year Built on Market							
Saginaw Township	64	22.9%	0.5% / 1.7	\$312,400	2,019	1984	89
Saginaw County	280	100.0%	0.5% / 1.8	\$187,450	1,663	1956	76

Source: Redfin.com & Bowen National Research

The 64 available for-sale homes in Saginaw Township represent 22.9% of the total available for-sale homes in Saginaw County. These homes equate to an availability rate of 0.5% when compared to the 12,678 owner-occupied units in the township, which is the same availability rate as Saginaw County (0.5%). Based on recent sales history, this inventory represents 1.7 *Months Supply of Inventory* (MSI). Typically, in healthy, well-balanced markets, approximately 2% to 3% of the for-sale housing stock should be available for purchase and there should be between four and six months of available inventory to allow for inner-market mobility and household growth. The available for-sale homes in Saginaw Township have a median list price of \$312,400, an average number of days on market of 89 days, and an average year built of 1984. The data illustrates that there is a limited number of homes available for sale in the township compared to the overall inventory of owner-occupied homes. This limited inventory of available for-sale homes combined with a relatively low average number of days on market has likely contributed to the steady increase in for-sale pricing since 2022.

Planned & Proposed

In addition to the surveys of each housing type within this overview, Bowen National Research conducted interviews with representatives of area building and permitting departments and performed extensive online research to identify residential projects either planned for development or currently under construction within the Saginaw Township area. It appears one project is located within Saginaw Township. The following summarizes the known details for this project (highlighted in red) and other housing developments by type that are planned, proposed, or under construction within Saginaw County. Note that additional projects may have been introduced into the pipeline since the interviews and research were completed.

Multifamily Rental Housing Development – Saginaw County

N/A – Not Available

As the preceding illustrates, there are a total of two multifamily rental housing projects and six for-sale housing projects in various phases of development in Saginaw County. The for-sale housing development located within Saginaw Township (Shattuck Farms III) will consist of 28 single-family homes with prices starting at \$480,000.

Development Opportunities

Based on a review of a variety of resources, potential development opportunities (sites) were identified in the subject market. This likely does not represent all development opportunities within the area. Note that the Map Code number for each site corresponds to the Development Opportunity Locations Map included on page VII-12 of the Housing Needs Assessment completed for Region G.

Development Opportunity Sites – Saginaw Township						
Map			Year	Building Size	Land Size	
Code	Street Address	Location	Built	(Square Feet)	(Acres)	Zoning District
153	6220 State St.	Saginaw	-	=	4.20	B-3 Community Commercial
154	3080 Schust Rd.	Saginaw	-	=	7.19	B-4 General Commercial
						R-3 Low Rise - High Density
155	Shattuck Blvd.	Saginaw	-	-	11.71	Residential
156	Midland Rd./Tittabawassee Rd.	Saginaw	-	=	15.37	A-2 Agricultural
						R-2 Medium Density Residential
157	Shattuck Rd./Lawndale Rd.	Saginaw	-	=	36.23	B-1 Office Business Commercial
	Mackinaw Rd./					R-1A Low Density Residential –
158	Tittabawassee Rd.	Saginaw	-	=	39.34	Transitional
159	5305-5365 Mackinaw Rd.	Saginaw	1880/1978	12,580	115.28	CB-1 Campus Business District

The seven development opportunity sites identified within Saginaw Township comprise a total of 229.32 acres with individual sites ranging between 4.20 acres and 115.28 acres. The only site with an existing structure is Map ID 139, which has a 12,580 square-foot building and is zoned CB-1 (Campus Business District). The remaining sites include various zoning designations for residential, commercial, and agricultural uses. For additional information on these sites and other sites throughout the region, refer to Section VII of the separate Housing Needs Assessment completed for Region G.

E. HOUSING GAP

Saginaw Township is located in Saginaw County. As shown in the Region G Housing Needs Assessment, the county has an overall housing gap of 11,094 units, with gaps of 2,877 rental units and 8,217 for-sale units. While a variety of factors influence the decisions of where people ultimately choose to live and where developers choose to develop, it is assumed that individual communities can reasonably capture a "fair share" of the overall county's housing needs. As such, we have applied the subject market's current portion of the overall county's renter and owner households to the county's housing gap estimates to derive the local community's estimated housing gaps. However, we recognize that it is possible that development efforts in the subject market of Saginaw Township could potentially satisfy the overall needs of the county, which were considered in the following demand estimates. Considering the preceding factors, a housing gap range is shown for each income segment in the following table. The low end of this range is reflective of the minimum housing gap/need for each segment based on the *township's* current share of the countywide housing stock. Comparatively, the high end of this range is reflective of total *county* housing gap/need for each segment.

The following table summarizes the rental and for-sale housing gaps by income and affordability levels for Saginaw Township. Details of the methodology and data used to derive the housing gap estimates are provided in Section VIII of the separate Housing Needs Assessment for Region G.

	Saginaw Township (Saginaw County), Michigan						
		Housing Gap Estimates (2024-2029)					
Percent of AMHI	≤60%	≤60% 61%-80% 81%-120% 121%+					
Household Income*	≤\$49,140	\$49,141-\$65,520	\$65,521-\$98,280	\$98,281+	Total		
Rent Range	≤\$1,229	\$1,230-\$1,638	\$2,458+	Housing			
Price Range	≤ \$163,800	\$163,801-\$218,400	\$218,401-\$327,600	\$327,601+	Gap		
Rental Housing Gap	452 – 1,524	207 - 699	148 - 501	45 - 153	852 - 2,877		
For-Sale Housing Gap	40 - 179	303 – 1,366	962 - 4,341	516 – 2,331	1,821 - 8,217		

Source: Bowen National Research AMHI – Area Median Household Income

As the preceding table illustrates, the projected housing gaps over the next five years encompass a variety of affordability levels for both rental and for-sale housing product. Overall, it is estimated that Saginaw Township has a *minimum* rental housing gap of 852 units and a *minimum* for-sale housing gap of 1,821 units. While the local market could outperform these minimum estimates and serve a greater portion of the overall county's housing needs, these housing gap estimates should provide a baseline for establishing priorities within the community. While housing gap estimates are substantially influenced by the projected changes in the number of households within an area over a specified time period, it is critical to note that housing gaps also consider many other housing needs and issues such as substandard physical conditions and housing cost burden.

F. STRENGTHS, WEAKNESSES, OPPORTUNITIES AND THREATS (SWOT)

A SWOT analysis often serves as the framework to evaluate an area's competitive position and to develop strategic planning. It considers internal and external factors, as well as current and future potential. Ultimately, such an analysis is intended to identify core strengths, weaknesses, opportunities, and threats that can lead to strategies that can be developed and implemented to address local housing issues.

^{*}Based on HUD limits for Saginaw County (4-person limit)

The following is a summary of key findings from this SWOT analysis for Saginaw Township.

SWOT Analysis				
Strengths	Weaknesses			
 Positive household growth in township between 2010 and 2024 and projected household growth will remain positive between 2024 and 2029 4.2% projected increase in <i>owner</i> households (2024-2029) Projected increase (7.2%) of households between the ages of 35 and 44 in township Significant projected increase in renter and owner households earning \$100,000 or more (2024-2029) Median household income (\$65,784) for township is higher than the overall county Nearly 60% of in-migrants to the township are under 35 years of age (may contribute to natural increase) 	 Projected decrease in renter households (2024-2029) No vacant units at Tax Credit and government-subsidized properties surveyed in the township Limited availability (0.5%) of for-sale housing High median list price for available homes (\$312,400) compared to county 			
Opportunities	Threats			
 Minimum housing need of 852 rental units (2024-2029) Minimum housing need of 1,821 for-sale units (2024-2029) Attract some of the 16,000+ commuters coming into Saginaw Township for work to live in the township Wait list of 1,100+ households for additional Housing Choice Vouchers in the county demonstrates significant pent-up demand for affordable housing alternatives in the area Several properties identified as potential development opportunities in township (nearly 230 total acres). 	 Lack of housing availability may result in households seeking options outside of the township Saginaw Township risks losing some of the 13,000+ residents that commute outside the township for employment Low availability of for-sale housing may contribute to increases in for-sale pricing Significant share (56.2%) of households aged 55 and older will likely impact future senior housing availability in the township 			

Saginaw Township has experienced moderate household increase between 2010 and 2024, with households in the township projected to increase during the next five years. In addition to the overall household growth in the township, note that significant increases are projected for both renter and owner households earning \$100,000 or more over the next five years. Availability is a notable issue among both rental and for-sale housing alternatives, which may be contributing to increasing housing costs. These availability issues are especially pronounced among Tax Credit and government-subsidized rental properties in the township, which had no vacant units at the time of our rental survey. These issues increase the probability of residents seeking housing options outside the township and county. Currently there are minimum housing gaps of 852 rental units and 1,821 for-sale units in the township and given the number of incommuters and in-migrants, additional opportunities to increase the area's household base are plentiful.

III. QUALIFICATIONS

The Company

Bowen National Research employs an expert staff to ensure that each market study includes the highest standards. Each staff member has hands-on experience evaluating sites and comparable properties, analyzing market characteristics and trends, and providing realistic recommendations and conclusions. The Bowen National Research staff has national experience and knowledge to assist in evaluating a variety of product types and markets.

Primary Contact and Report Author

Patrick Bowen, President of Bowen National Research, has conducted numerous housing needs assessments and provided consulting services to city, county and state development entities as it relates to residential development, including affordable and market-rate housing, for both rental and for-sale housing, and retail development opportunities. He has also prepared and supervised thousands of market feasibility studies for all types of real estate products, including housing, retail, office, industrial and mixed-use developments, since 1996. Mr. Bowen has worked closely with

many state and federal housing agencies to assist them with their market study guidelines. Mr. Bowen has his bachelor's degree in legal administration (with emphasis on business and law) from the University of West Florida and currently serves as Chairman of the National Council of Housing Market Analysts (NCHMA).

The following individuals provided research and analysis assistance:

Christopher Bunch, Market Analyst, has more than two decades of experience in conducting both site-specific market feasibility studies and broader housing needs assessments. He has conducted on-site market research of a variety of housing product, conducted stakeholder interviews and completed specialized research on housing market attributes including the impact of military personnel, heirs and estates and other unique factors that impact housing needs. He holds a bachelor's degree in geography from Ohio University.

Desireé Johnson is the Director of Operations for Bowen National Research. Ms. Johnson is responsible for all client relations, the procurement of work contracts, and the overall supervision and day-to-day operations of the company. Ms. Johnson also coordinates and oversees research staff and activities. She has been involved in the real estate market research industry since 2006. Ms. Johnson has an Associate of Applied Science in Office Administration from Columbus State Community College.

Pat McDavid, Market Analyst, has conducted housing research for housing needs assessments completed throughout the country. Additionally, he is experienced in analyzing demographic and economic data in rural, suburban and metropolitan communities. Mr. McDavid has been a part of the development of market strategies, operational and fiscal performance analysis, and commercial, industrial and government (local, state, and federal) client consultation within the construction and manufacturing industries. He holds a bachelor's degree in educational studies from Western Governors University.

Jody LaCava, Research Specialist, has more than a decade of real estate research experience. She has extensive experience in surveying a variety of housing alternatives, including rental, for-sale, and senior housing. She has experience in conducting on-site research of real estate, evaluating existing housing properties, conducting interviews, and evaluating community services. She has been involved in industry leading case studies, door-to-door resident surveys and special needs housing research.

In-House Researchers — Bowen National Research employs a staff of in-house researchers who are experienced in the surveying and evaluation of all rental and for-sale housing types, as well as in conducting interviews and surveys with city officials, economic development offices and chambers of commerce, housing authorities and residents.

No subconsultants were used as part of this assessment.
